Art Unit: 1714

The amendment received 25 April 2007 has been made of record. Claims 1-73 are pending.

The objection to claim 58 is withdrawn in view of applicants' amendments.

Claims 1-23, 25-41, 44-49, 52 and 58-73 are rejected under 35 U.S.C. 103(a) as being unpatentable over Markel et al in view of Velasquez Urey and Ogawa et al.

This rejection is maintained substantially as set forth in the previous office action. Applicants' arguments in traversal focus on the newly added limitation to % beta crystallization and K values for the nucleating agents. These arguments are not persuasive since the reference to Velasquez Urey recites adipic acid as a preferred nucleating agent. This species is seen as fulfilling the requirements of the nucleating agent of the rejected claims since it is among those listed in instant claim 46 as suitable.

Claims 24, 42, 43, 50, 51 and 53-57 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
